

### Course I: Medicare and the Dental (Sleep Medicine) office

This course will help the participants better understand their responsibilities with Medicare, the enrollment options and responsibilities, even if they choose not to enroll. Medicare "sets the standards" for which commercial plans look when creating their policy guidelines which is why it is important to understand Medicare guidelines.

### Course II: Implementing dental sleep medicine into your practice: the ABC's.

Providers, whichever business model you choose for your DSM practice, you have to understand the pro's and con's of each choice. We will review options on participation, types of policies and related options for provider enrollment along with an overview on policies.
