

IMPLANT TREATMENT COORDINATOR SKILLS

Create a *smooth* & *productive* process. Implement an **Implant Coordinator!**

Want to be able to delegate patient education responsibilities?

Implant procedures require additional team training and patient education to increase comfort.

LEARNING OBJECTIVES

- Teach the team to understand and simplify the implant process;
- Review verbal skills to increase case acceptance;
- Discuss duties and responsibilities to properly utilize an Implant Coordinator.

Do you spend more time *discussing* treatment with your patients than *performing* treatment? Implement an Implant Coordinator; and utilize this person properly. Having systems in place and an individual designated to properly see the process through is critical. This course provides tools for new and established Implant Treatment Coordinators for a smooth and productive process. Decrease “doctor time” while building a successful dental implant practice.

Leslie D. Icenogle, Speaker & Coach
Dental Implant Auxiliary Training

Meet Leslie...

Leslie has been a Practice Manager and Implant Treatment Coordinator in the Oral & Maxillofacial Surgery field since 1986. She was selected to become a Program Advisor for CareCredit providing training to a wide variety of health care professionals for 10 years. Leslie has obtained her AAOMS certification for medical and dental coding, which includes soon to be implemented ICD.10. Leslie is a certified dental radiographer specializing in CBCT imaging and its many applications in the dental field.

Leslie is the founder of Dental Implant Auxiliary Training providing team training to successfully build and/or grow your implant practice. She obtained her Fellowship with The Association of Dental Implant Auxiliaries. She is a member of The National Speakers Association, The Speaker's Podium, The Speakers Consulting Network, and The American Association of Oral & Maxillofacial Surgeons, and VP of her Toastmasters chapter. Leslie enjoys being able to improve patient's lives through increasing your case acceptance; while improving the lives of dentists and dental auxiliaries with standard operating procedures and team motivation.

Keynote Speaking . Half Day / Full Day Lectures . Interactive Webinars

Entertain and educate your attendee's with result-driven courses! Leslie can provide an information packed keynote speech or hold the audience's attention for a full day. All of her courses engage the entire room to motivate and promote positive change.

Having successfully managed and coached dental practices for years, the entire team will leave with new, fresh ideas and proven systems that can be implemented the very next business day! Doctors will enjoy an increase in production and profit with the entire team will benefit from less stress in the work environment.

Leslie was the only auxiliary speaker to win a top award for Spotlight on Speaking at the 2014 Speakers Consulting Network annual meeting. Call to book Leslie now!

"Providing continuing education to the dental team will make for a more profitable and enjoyable work environment."
